Vishnu Koushik Bandaru

Product Designer | B2B SaaS · UX Strategy · Workflow Design

Hyderabad, India · koushikbandaru.uxd@gmail.com · Behance portfolio

SUMMARY

Product designer building recruiter workflows for an AI-powered B2B recruiting platform at Leoforce, where I was the sole designer on CONNX, a recruiter communication product. I take problems from recruiter shadowing and field research through user flows, interaction states, and edge-case guardrails to engineering handoff. A B.Des (Hons) in Industrial Design gives me systems thinking and a maker's eye for detail.

EXPERIENCE

UI/UX Designer — Leoforce

Jul 2026 – Present

AI-powered recruiting platform

- Design recruiter-facing experiences focused on communication workflows and in-product decision-making.
- Contribute to **Auto Dialer** and related recruiter workflows, turning product requirements into user flows, interface designs, interaction states, and UX guardrails.
- Partner with product and engineering from requirements through Jira tickets, design handoff, and iterative refinement.

UI/UX Design Intern — Leoforce

Nov 2025 – Jul 2026

Sole designer on CONNX, a recruiter communication platform

- Led end-to-end UX/UI for CONNX using the Double Diamond process, from discovery and workflow understanding to design development.
- Shadowed recruiters through their daily work to identify friction across calling and candidate conversations.
- Produced user flows, wireframes, high-fidelity Figma screens, and prototypes, including the **active-call experience**.
- Converted to a full-time UI/UX Designer role at the end of the internship.

Product Design Intern — PractiSc Learning Innovations Pvt. Ltd.

May 2025 – Jun 2025

- Turned user needs into manufacturable consumer-product concepts through user research, competitor analysis, and market study.
- Built 3D CAD models and iterative prototypes, exploring fabrication methods, material selection, and finish detailing.

SELECTED PROJECTS

Telmy — AI-Powered Mobile Personal Assistant

Aug – Oct 2024

Studio project · Team lead, 6 members

Led a six-person team designing an assistant that helps managers handle calls and organise schedules. Contributed user research, competitive analysis, product direction, and UX design.

System Design — Food Adulteration

View on Behance

Mapped the food-adulteration problem space through research and stakeholder mapping, synthesising interconnected factors into a GigaMap to find points for intervention.

Bamboo Exploration

View on Behance

Material-focused industrial design project exploring bamboo's possibilities as a design material.

EDUCATION

B.Des (Hons), Industrial Design — Woxsen University

2026

SKILLS & TOOLS

Product & UX: Problem framing, user research, competitive analysis, user flows, information architecture, wireframing, interaction design, prototyping, UX edge cases and guardrails

Tools: Figma, Adobe Photoshop, Illustrator, InDesign, Fusion 360, Jira

Industrial Design: 3D CAD modelling, physical prototyping, 3D printing, laser cutting, material exploration
